

Services

20
years

From start to finish, we're here for you.

We know how important it is that your communications infrastructure works all day, every day. After all, staying connected with your clients is essential for business success. So to ensure your telecommunication system works well for you and your business we are with you every step of the way, from developing the best system for your needs, through to installation and maintenance.

TAA Connect first opened its doors in Brisbane in 1992 as a telephony services company, and has since grown to be one of the largest independent suppliers of hardware and communication solutions in Australia. Every year we help businesses to be the best they can be through telephony, IT, audio and video-conferencing, networking, software, point of sale, messaging, mobile and broadband solutions.

Strength in voice and data systems

Services

Experience

TAA Connect has been servicing Australian businesses with telephony and IT solutions for almost two decades. We began our company based on knowledge that the key to implementing successful solutions was to truly understand our clients' business, and nothing has changed. We aim not to tell you 'how things will be' but rather, ask 'how would you like things to be?' We hear you.

Cabling

Whether you need to install new cable or upgrade an existing network, our experienced technicians have got you covered. Fibre optic solutions, VOIP network and VOIP telephone cabling, Cat5 and Cat6 cabling - you name it, we do it. And with AS/NZS ISO and GISC accreditation, you can be sure that you are receiving the best quality service in the industry; every job, every time.

Maintenance

Think of telecommunication maintenance in the same way you think about car maintenance - if you don't do it, a breakdown is inevitable. Our Maintenance Contract entitles you to routine and emergency servicing, help desk support, labour costs and even the parts required needed to keep your systems running smoothly.

Consultative

Businesses come in different shapes and sizes, so a one-size-fits-all approach to communications infrastructure just doesn't make sense. At TAA Connect, we pride ourselves on having the know-how and the resources to tailor a solution that fits your business. If you feel that your business could benefit from our customised services, speak to our consultants today. We hear you.

On-site tech support

What happens when your video conferencing device breaks down an hour before the big meeting? When you are contracted with us you are just one phone call away from assistance. And if we can't sort things out over the phone we will send one of our technicians to any office Australia or New Zealand wide. In other words, we will focus all our energy on the problem so you don't have to. After all, with that big meeting coming up, you have other things to think about.
